

Cooperation between Government and civil society in the management of migration: The Italian Case

Gabriele De Giorgi
Former Political Adviser to the Italian
PM 2016-2018

Subsidiarity

- Using the Najam's scheme we must highlight that there is not a prevalent categorization.
- In 2017 the relationship between the national government and Ngos worsened in every aspect.
- Some regional areas maintain positive and constructive relations.

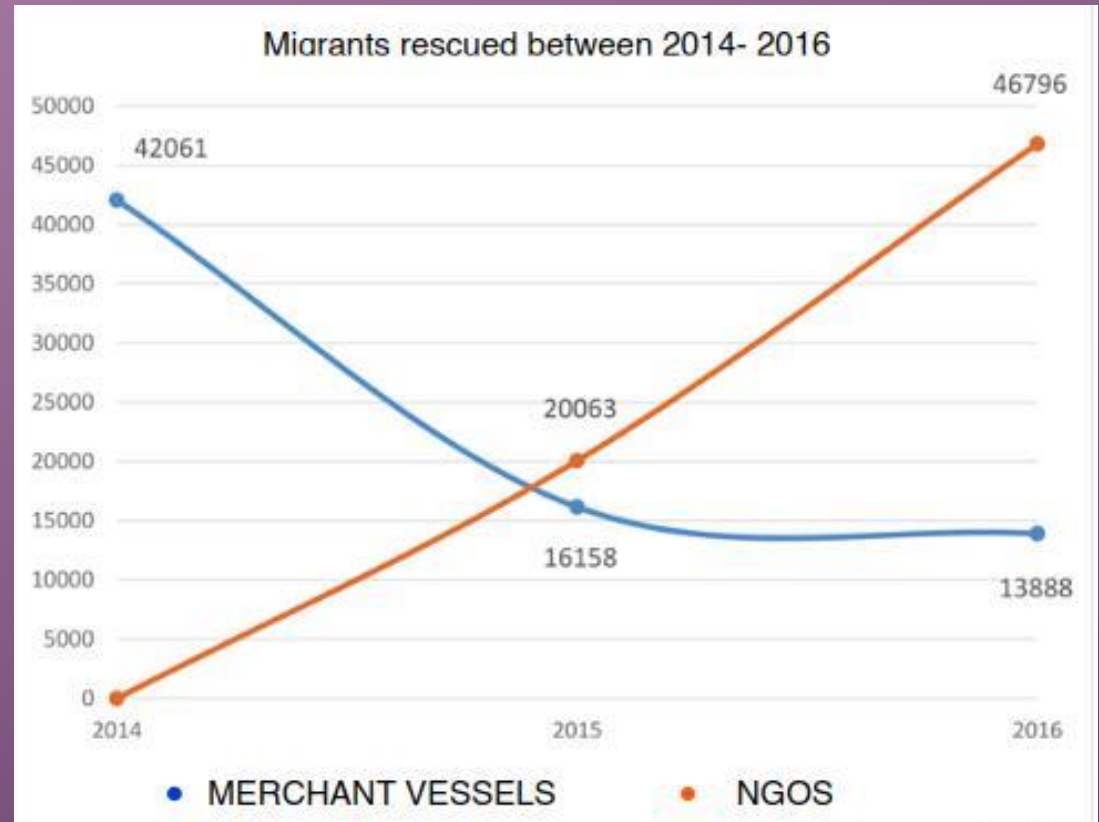

SAR and NGOS

- NGOs provided an extensive subsidiarity uplifting the situations of the merchant vessels
- The spotlight over the Mediterranean crisis augmented the NGOs presence and their capacity.

SAR and NGOs

- Pull factor?
 - Bias over the numbers
 - Post hoc ergo propter hoc.
- NGOs provided relief for the Merchants vessels

Data provided by the Italian Coast Guard 2017

NGO code

- The code as a first step in rebooting the Montego Bay, Hamburg, UNCLOS obligations.
- The code as a first act in reorganizing the relation between Italian government (and the public) and NGOs
- The code as a way to shape the public debate.

Narrative about SAR

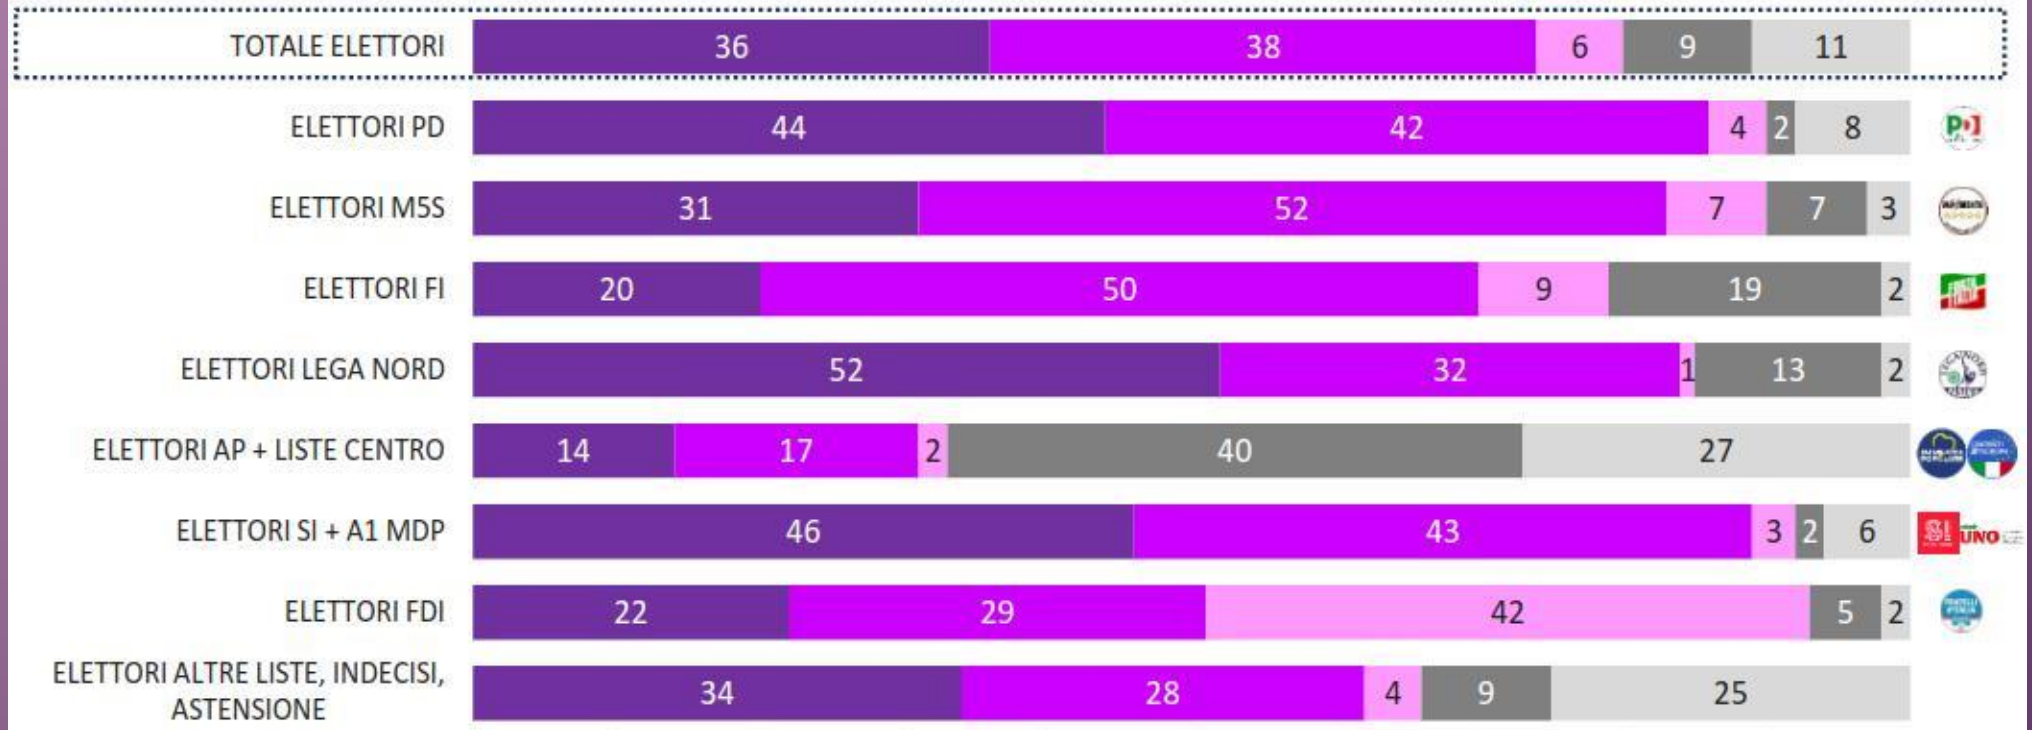

- Capacity < Willingness
- Profit > Moral Obligation
- Asylum seekers = Illegals migrants

Avoiding Sar

- SAR is a failure itself.
- SAR has been spectacularized
- Different projects seems less attractive
- Positive experiences in Humanitarian corridor by faith based organization (resettlement)
